Motijheel Govt. Boys' High School

Secondary School Certificate (SSC)

Group – Science

GPA 5.00 (On a scale of 5.00)

### JOB RESPONSIBILITIES

#### Insurance Management System (IMS)

An in-house software for my current company built with Laravel Back-end and Vue Front-end. I have contributed to this software since June 2021 till now. My responsibilities include writing efficient and understandable code according to user requirements and publishing these changes to Github and our server.

#### Insurance ERP

This is a second in-house software built with ASP.NET MVC and JQuery Front-end. Built initially for head offices and gradually shift to a wider scale for the company. Working on it since January 2022 till now.

Both of this software include CRUD operations, file upload, QR Code generation, report printing, and many more vital functionalities of an Insurance Management System

#### RESTFUL API

- I completed a bill pay API for Nagad & Upay to perform policy premium payments through Nagad, and Upay mobile apps into our system.
- The Insurance Development and Regulatory Authority of Bangladesh (IDRA) provided us with their NID verification API which was integrated into our system by me.

---

## INDEPENDENT PROJECTS

---

### Dental Website

A complete dental website with Vue Front-end and a Laravel Back-end along with an Admin LTE panel. Admin users can add, edit, and delete treatments available, doctor information, and many more.

### Restaurant Website

Build with React.js, this is a complete front-end project of a modern restaurant website. Users can view menus, locations and also make an online reservation. The back-end is still on going.

### Social Media Platform

A social media platform website like Facebook, users can post, update, and edit statuses, and they can upload and change their profile photos and cover photos. New friends can be added and pages can be created. Users can post to these pages and follow any page they like.

### Task Management System (TMS)

Task management system assign tasks to other users under that organization, pin important tasks of any user, and mark tasks if they are completed.

### E-commerce Website

An E-commerce website built with react front-end and temporary google firebase authentication. Users can add, and delete products to their cart.
