EXPERIENCE

June 2021 – Present	Mercantile Islami Life Insurance Ltd. Full-Stack Developer Used Laravel and Vue.js to develop an in-house Insurance Management System software. Currently using ASP.Net MVC to build an ERP solution for the company

EDUCATION

2017 – 2020	North South University BS in Computer Science & Engineering CGPA 3.66 (On a scale of 4.00)
2014 – 2016	Notre Dame College Higher Secondary Certificate (HSC) Group – Science GPA 5.00 (On a scale of 5.00)
2003 – 2014	Motijheel Govt. Boys' High School Secondary School Certificate (SSC) Group – Science GPA 5.00 (On a scale of 5.00)

PROJECTS

Insurance Management System (IMS)
An inhouse software for my current company built with Laravel Back-end and Vue Front-end. I have contributed on this software since June 2021 till now. My responsibilities include writing efficient and understandable code according to user requirements and publish these changes to Github and our server.

Insurance ERP
This is a second inhouse software built with ASP.NET MVC and jquery Front-end. Built initially for head offices and gradually shift to a wider scale for the company. Working on it since January 2022 till now.

INDEPENDENT PROJECTS

Dental Website
A complete dental website with Vue Front-end and a Laravel Back-end along with Admin LTE panel. Admin user can add, edit, delete treatments available, doctor information and many more.

Restaurant Website
Build with React.js, this is a complete front-end project of a modern restaurant website. Users can view menu, locations and also make online reservation. Back-end is still on going.

More Project details – **https://md-samiur-rahman.netlify.app/**

Social Media Platform
A social media platform website like facebook, users can post, update, edit status, they can upload and change their profile photos and cover photos. New friends can be added and pages can be created. Users can post to these pages and follow any page they like.

Task Management System (TMS)
Task management systems to assign tasks to other users under that organization, pin important tasks of any user and mark tasks if they are completed.

E-commerce Website
An E-commerce website built with react front-end and temporary google firebase authentication. Users can add, delete products to their cart.
